Answer key

One more than a double

Find the double. Use it to solve the sum just below it.

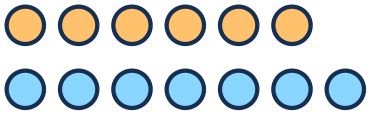

3 + 3 = 6

3 + 4 = 7

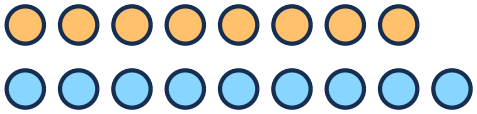

5 + 5 = 10

5 + 6 = 11

6 + 6 = 12

6 + 7 = 13

8 + 8 = 16

8 + 9 = 17

The second sum has one extra counter.
